Flow chart

Facial Recognition System: FRS

Should facial recognition system (FRS) alarm Clara about strangers in her house?

FRS detects someone at the front door

FRS detects Clara's friends/ acquaintances

True

- Announce Clara's friends/ acquaintances that she is not at home
- Send a message to Clara to notice her the presence of her friends/ acquaintances

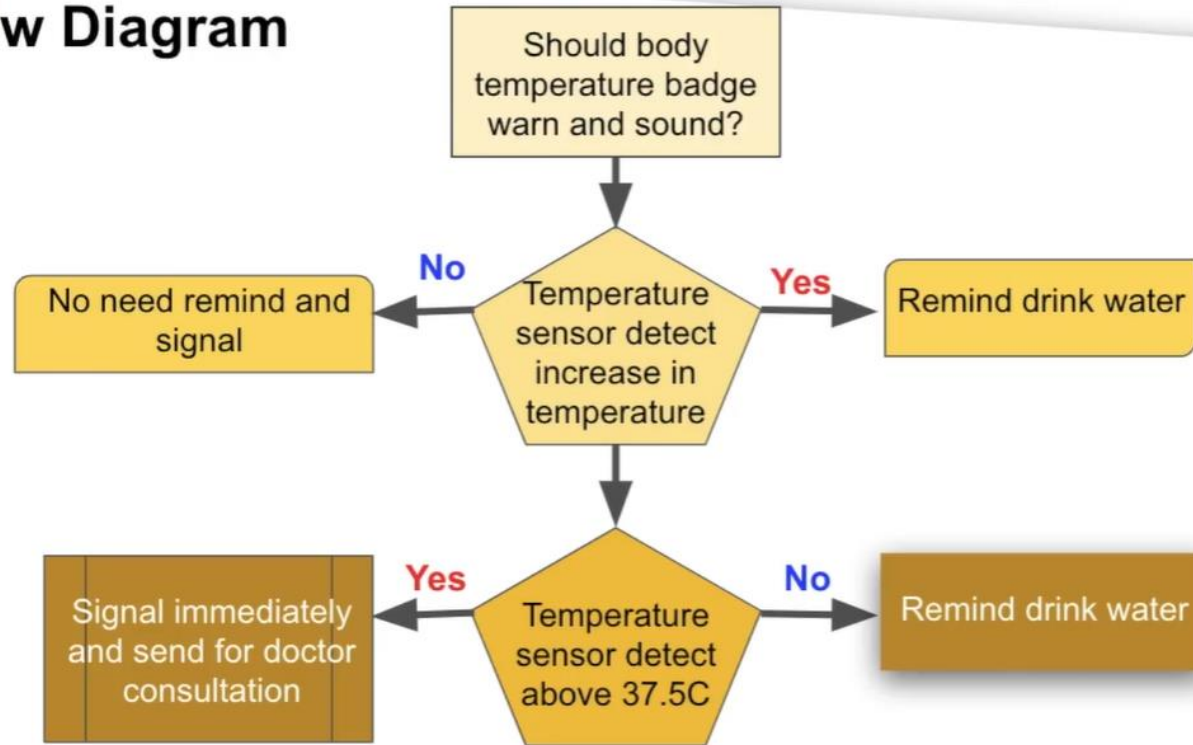

False

Activate the warning system: calling Clara immediately via app and connect her directly with the camera of the FRS

Courses outline

Monitoring Environment Change with Drone Technology

Part 1. Drone DIY

Part 2. Hands on UAV

Part 3. UAV Application

Part 4. UAV v.s. SDGs

Quiz 1. What is the “C” of CDIO stands for?

- (A) Conceive
- (B) Create
- (C) Catch
- (D) Communication

Please complete in Corelab

III. Hands on UAV & drone DIY

Part 1. Drone DIY

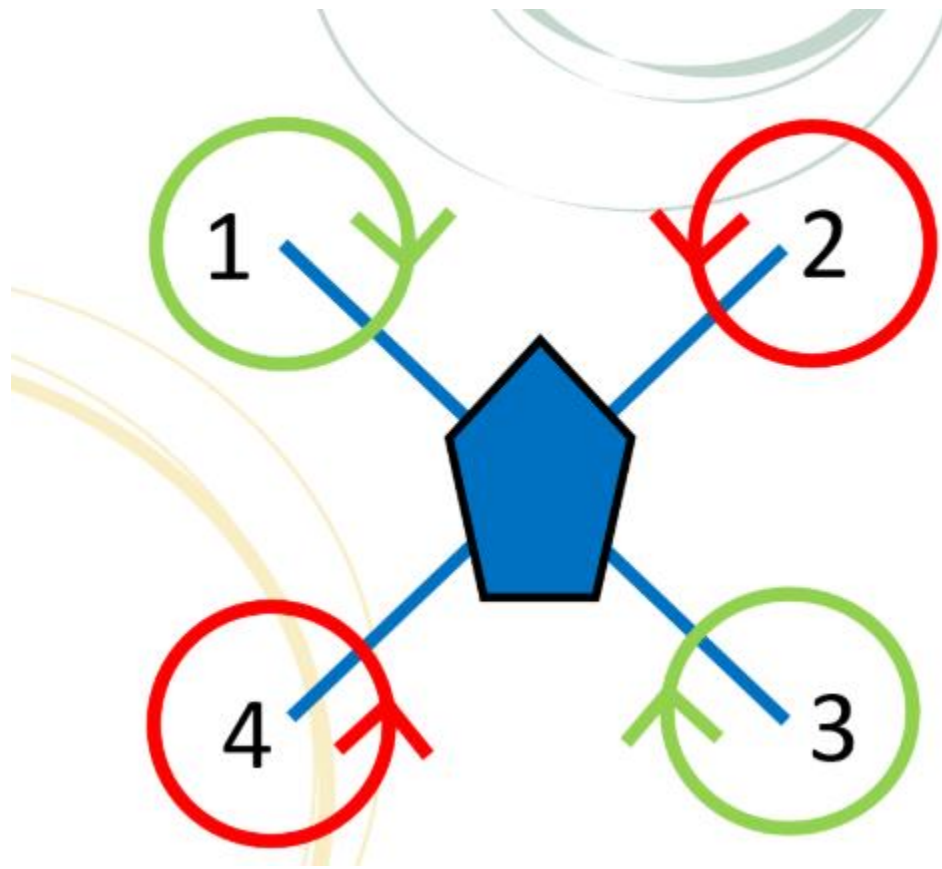

Flight attitude

Helicopter

- **Lift**
- **Torque**
- **Rotation**

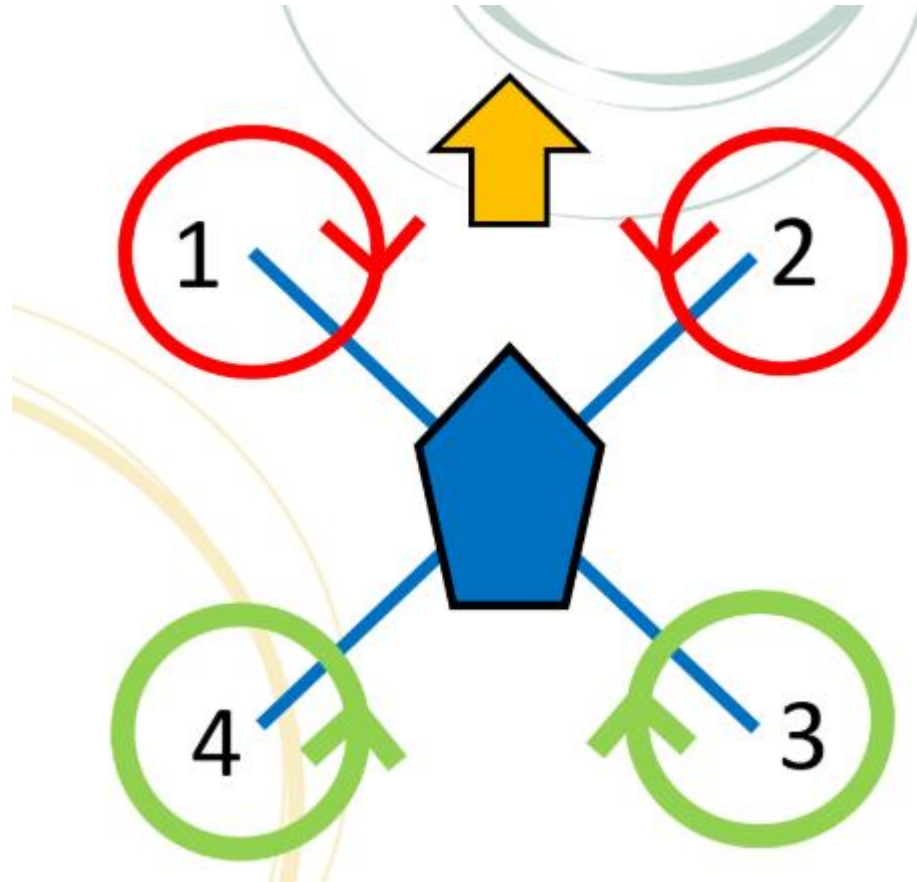

Flight attitude

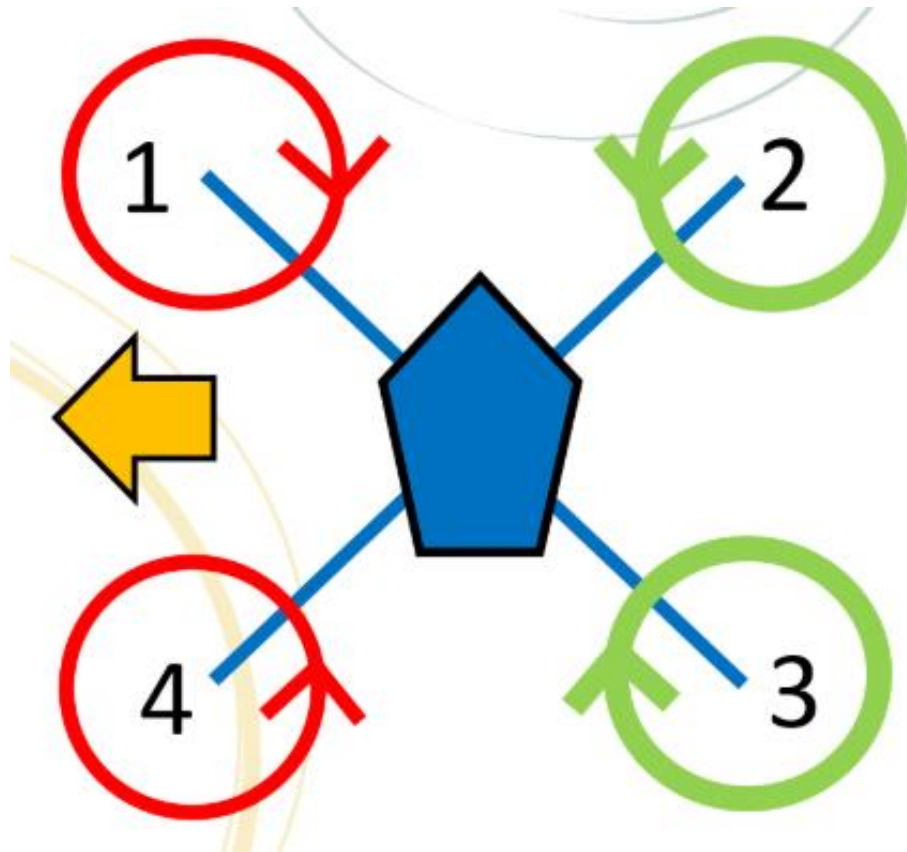

Quadcopter

- **Four axis**
- **Vertical takeoff and landing (VTOL)**
- **Clockwise : number 1,3**
- **Counterclockwise : number 2,4**

Flight attitude - Pitch

Flight attitude- Roll

Flight attitude- Yaw

Make your own drone

Materials

Part 2. Hands on drone

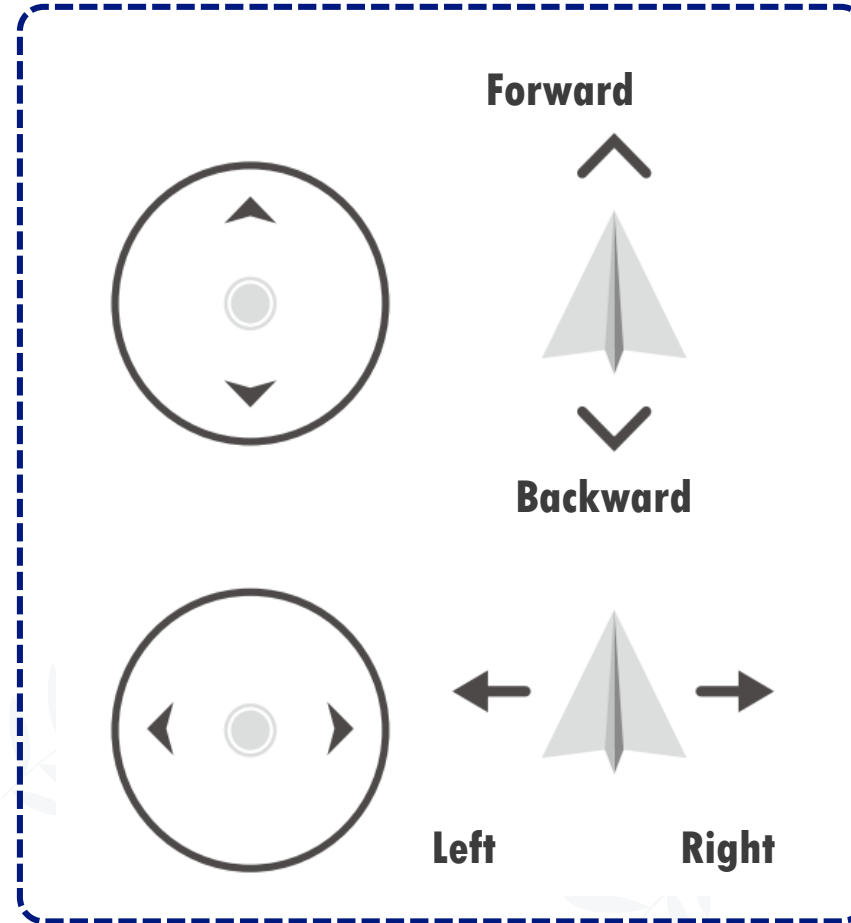

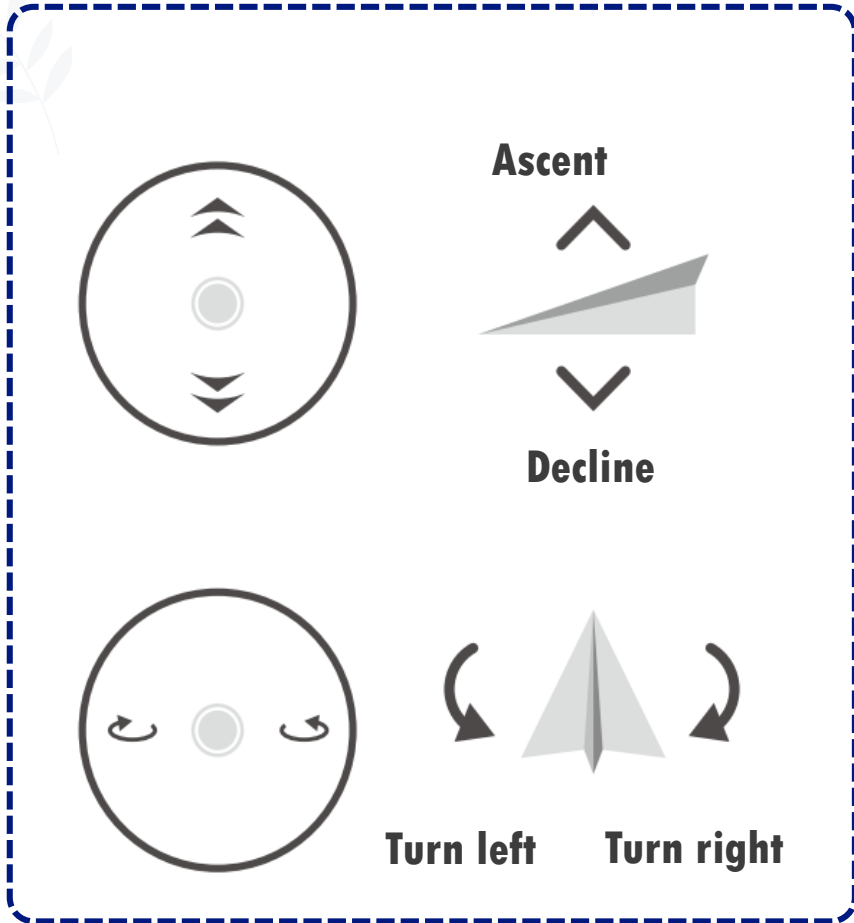

Quiz 2. Which material is necessary when making the DIY drone? (one or more than one answer)

- (A) Motor**
- (B) Paddle**
- (C) Coffee cups**
- (D) Coffee cover**
- (E) Battery**

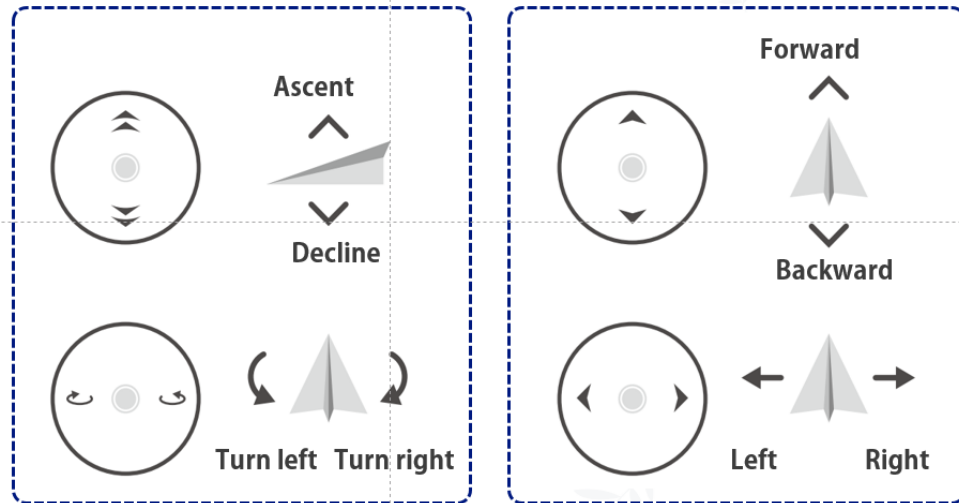

Please complete in Corelab

American remote control

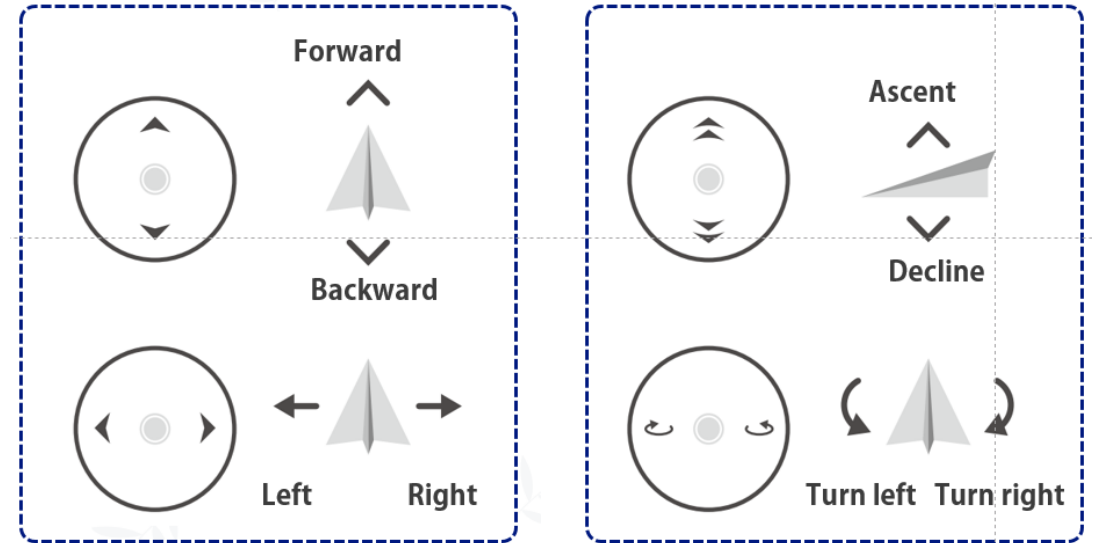

Quiz 3. Which is American remote control?

(A)

(B)

Please complete in Corelab

IV. UAV Application & UAV v.s. SDGs

Part 3. UAV Application

**Have you ever think about what can drone do
in our daily life?**

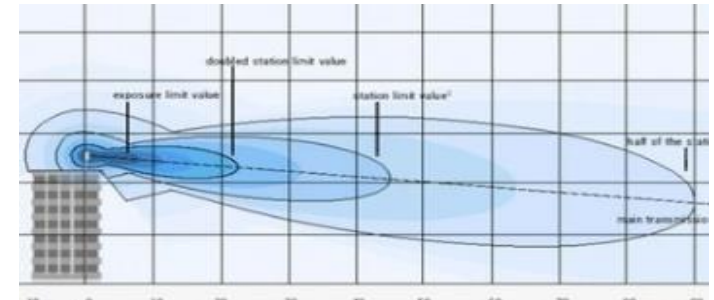

Tower/ Power Line Analyzer

Signal measurement

Spectrum analyzer detects the base station signal and finds the signal abnormal value to replace the antenna device.

Different signal strength data with elevation and Euler angles presented in space coordinates

Non-destructive testing

Detecting the crack and strength of the base structure through image recognition

Camp detective

HJUAV detecting system can not only use signal measurement but also use in the area security detective. HJUAV provides the camp or specific area fixed route patrol. With normal camera and thermal camera, the detecting will not bother by day and night.

Multi-drone Forward Observation System

Geology & Natural Resources

Through aerial projection image, system can splice large image for land reclamation or land planning. Moreover, this tech can be used in many industries such as agriculture, mining and so on.

3D Modeling

Fault exploration

Reservoir construction

Water detection

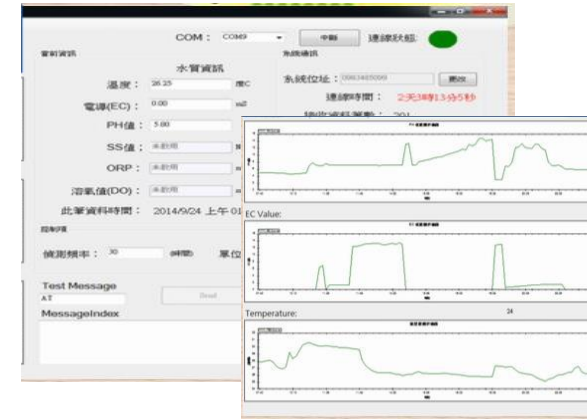

HJUAV helps reduce the difficulties of pollution detection, especially water testing. Through the UAV system, it helps inspectors get test samples in shorter time and easier way.

Import actual space into system

On site operation

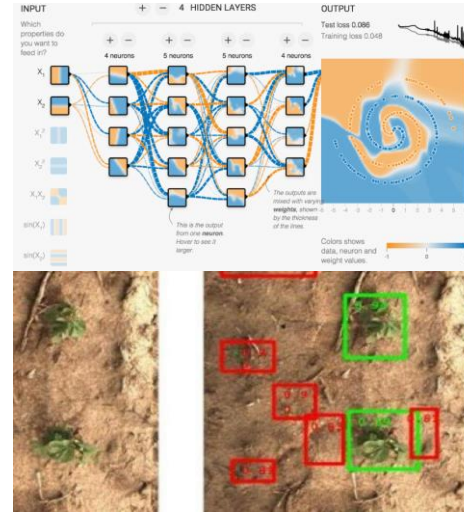

PC platform integration monitor

AI Agriculture

WEB/ Server
AIOT+

- **Agriculture medication data base**
- **Spraying and monitoring data collection**
- **Flight mission management**

Big Data Analysis

Recognize Algorithm

Joint Pattern Cloud Algorithm

Logistic

HJUAV come over with the difficulties of payload weight. Using heavy payload drone with shelf deliver the goods. Let the delivery easier through the fixed air route.

Medical rescue

HJUAV come over with the difficulties of medical rescue. Using heavy payload drone with shelf and ridge deliver the medicine such as serum. Let the delivery easier through the fixed air route.

Quiz 4. What is the AI Agriculture based on? (one or more than one answer)

- (A) Rich agriculture experience**
- (B) Automatic Sprinkler**
- (C) Server AIOT**
- (D) Data analysis**

Please complete in Corelab

**Quiz 5. What is the directly benefit of using UAV in medical rescue?
(one or more than one answer)**

- (A) Save times**
- (B) Lower cost**
- (C) Create more work opportunities**
- (D) Extend the rescue time**

Please complete in Corelab

Part 4. UAV v.s. SDGs

SUSTAINABLE DEVELOPMENT GOALS

17 GOALS TO TRANSFORM OUR WORLD

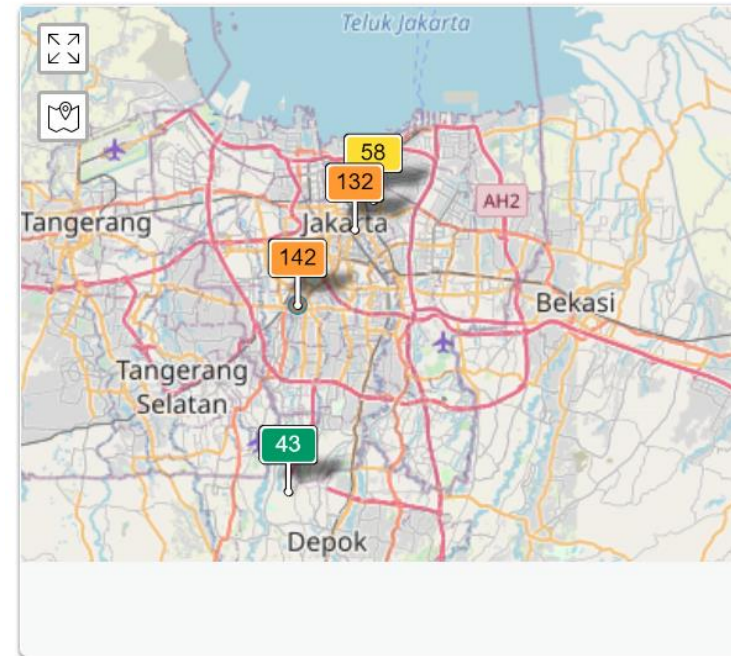

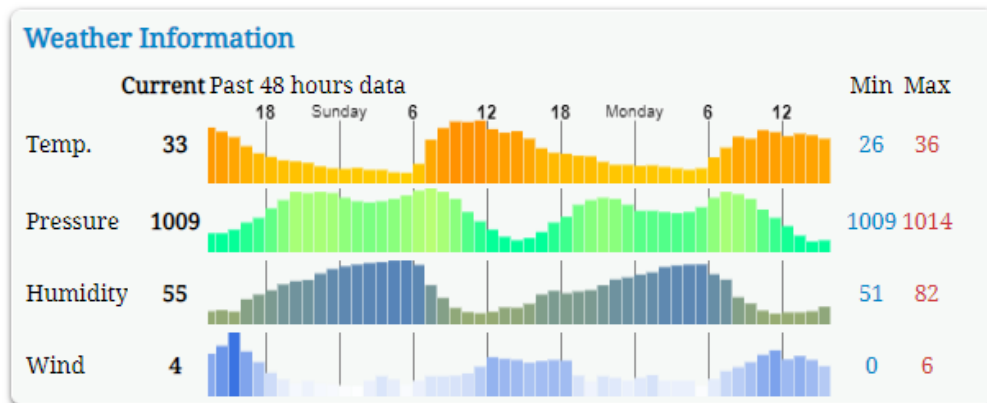

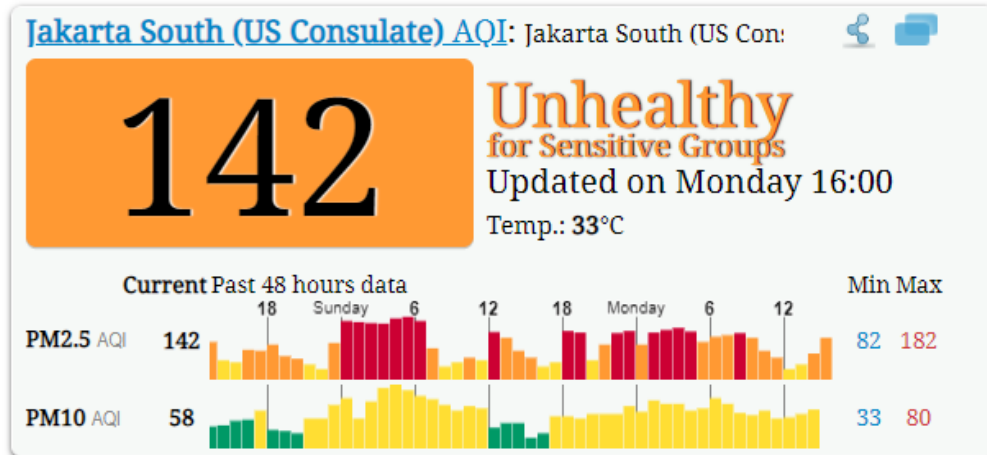

Sources of Air Pollution

- Industry & Energy Supply
- Transport
- Waste Management
- Dust
- Agricultural Practices
- Household Energy

Real-Time AQI in Jakarta

Could Drones Help?

Fight Air Pollution Using Drone

Sniffing out the problem

Polish authorities are using drones equipped with sensors that can evaluate the air's chemical makeup onboard, and in turn fining the offenders who are releasing contaminants.

LAB

PM2.5/Air Quality Monitor

Optical Dust Sensor

The sensor has a tiny six-pin connection interface, it comes with a connector when you usually buy it. The sensor generates an analog output signal on pin5- Vo, it does not require any external components for operation and requires only a 3.3V supply, making it easy to interface with the Arduino board. Some example applications of this sensor include:

- Air purifier
- Air conditioner
- Air monitor
- PM2.5 detector

Sharp's GP2Y1010AU0F optical dust sensor

How Dust Sensor Works?

Laser PM2.5 dust sensor

What can UAV do more?
